

TECHNICAL DATA SHEET

DNW ECO-PRIME[®]

Ecological, highly acidic cleaner

Application

DNW ECO-PRIME is an ecological highly acidic cleaner and limescale remover for professional use. Use this product for periodic, thorough removal of limescale deposits and general cleaning of appliances and machinery in the food and cosmetic industries. DNW ECO-PRIME does not contain any inorganic acids.

Environmental Benefit: Ecover Professional cleaning products are free from halogen compounds such as chlorine, persistent chemicals and petrochemical-based surfactants. Surfactants used in these products originate from plant sources. All ingredients of non-mineral origin are fully degradable and the surfactants have low aquatic toxicity.

Instructions for use

Manual cleaning: Prepare a 1 - 10% solution of DNW ECO-PRIME in hot water. Apply the diluted product to the surface to be cleaned. Allow it to work for 10 to 30 minutes. Rinse with lukewarm water after cleaning.

Although DNW ECO-PRIME contains a corrosion inhibitor, it is not recommended for use with chrome-plated or nickel-plated parts. DNW ECO-PRIME can be applied undiluted to a scouring pad and used to remove limescale, fat and protein deposits.

CIP cleaning: Contact Doronwell for dilution and temperature guidance.

Technical data

Odour	odourless
Colour	light yellow
Appearance	transparent thin liquid
ph value	2
Brix	7
Relative density 20°C	1,04 kg/l
Viscosity	<50 mPa.s at 25 °C

Safety

Please refer to Material Safety Data Sheet.

Packaging

20L Containers
